

# Register for Final Project Grading

Please register below for final project grading. Provide the URL of your project hosted on OpenShift, and the URL of the GitHub repository where you have the source code of your project. Make sure the project is always at a stable usable state. You will be texted/emailed shortly before we start grading your project. Please stop all development when you receive the text/email. The final grading order will be settled on midnight Sunday EST, before grading actually starts. Anyone not registered by midnight Sunday EST will be graded before the ones that register in no particular order.
